

Dear FCC; I would like to comment on the ARRL's proposal RM-10867 on license restructuring for Amateur Radio. I believe that this proposal is the fairest and most appropriate of all the current proposals in front of the restructuring committee. I support all of the rational logic that has been written into RM-10867. The ARRL has worked very hard on this proposal to accommodate the Amateur Radio Community. Even though not all of the members of this community will be satisfied on any changes that the FCC will decide to implement, I do believe that the committee should give great consideration to RM-10867.

Thank You

K6AOM
